AHMED GAITER

APPLIED AI ENGINEER | LLM SYSTEMS & PYTHON BACKEND

Cairo, Egypt | +20 106 933 4256 | ahmedekramy303@gmail.com

LinkedIn | GitHub | Portfolio

PROFESSIONAL PROFILE

Software engineer specializing in applied AI and Python backend development. Builds LLM-powered applications, stateful agent workflows, RAG pipelines, and asynchronous APIs with FastAPI, LangGraph, Redis, and Celery. Contract experience spans AI integrations, Python automation, and LLM-generated code evaluation.

TECHNICAL SKILLS

AI / LLM: LangGraph, LangChain, RAG, tool calling, LLM provider routing, vision-language models, Whisper
Backend: Python, FastAPI, AsyncIO, WebSockets, REST APIs, Pydantic v2, Celery, Redis
Data / DevOps: PostgreSQL, SQL, Alembic, Docker, GitHub Actions, Pytest, Git, TypeScript

PROFESSIONAL EXPERIENCE

AI & Backend Software Engineer | Independent Contractor — Jan 2024 – Present

- Built asynchronous FastAPI services and RAG workflows; moved heavier processing into Redis-backed Celery jobs to keep API and real-time flows responsive.
- Integrated Groq, Gemini, and OpenAI with fallback handling for provider throttling or service errors; added Pydantic schema validation for structured outputs.
- Implemented commerce automation, payment webhook verification, and atomic PostgreSQL ledger updates; packaged services with Docker and GitHub Actions CI/CD.

AI Integration Engineer | Springer Capital · Contract — May 2025 – Sep 2025

- Developed Python automation scripts and LLM-enabled API integrations for operational workflows, data transformations, and ingestion pipelines.
- Collaborated in a remote engineering team on API schemas and improvements to data integration reliability.

AI Alignment & Code Security Specialist | Atlas Capture · Contract — Dec 2024 – Feb 2025

- Reviewed and debugged LLM-generated Python and TypeScript code; assessed prompt-injection scenarios, response correctness, and security edge cases.
- Applied Pydantic-based schema checks to verify structured API and model outputs.

SELECTED INDEPENDENT PROJECTS

Meridian · Multimodal Document Intelligence | Vision LLMs · Whisper · FastAPI · Pydantic

- Created a vision-language workflow for industrial diagrams, blueprints, and invoices, with structured Pydantic output validation.
- Added speech transcription with Whisper and voice-activity detection for voice-based document queries.

AutoHire · AI Technical Interview Platform | LangGraph · WebSockets · Redis · Celery · Pytest

- Designed a stateful AI interviewer using LangGraph and bidirectional FastAPI WebSockets for live candidate interactions.
- Separated transcript evaluation into background Celery tasks; tested WebSocket lifecycles and agent state transitions with Pytest.

Shiphny · Multi-Agent Logistics Platform | FastAPI · LangGraph · PostgreSQL · Alembic · Docker

- Built a logistics support agent with bounded tools for shipment tracking, cancellations, and billing; used PostgreSQL and Redis for persistent data and sessions.
- Implemented provider fallback handling and container build/test workflows via GitHub Actions.

EDUCATION

B.Sc. Computer Science | Mansoura University, Egypt — 2019 – 2023
